CONTENTS

Introduction..... 3

Chapter 1. Current situation and bases of hydrocarbon reservoir development 7

1.1. Situation and existing concepts of hydrocarbon reservoirs development..... 7
1.2. Bases and principles of oil and gas reservoir development..... 28
1.3. Procedures and decision making methods in hydrocarbon reservoir development..... 37

Summary..... 42
Bibliography..... 43

Chapter 2. Scientific bases of hydrocarbon reservoir engineering in fuzzy information environment..... 48

2.1. Architecture of hydrocarbons reservoirs development systems. Formal systems of structural approximation..... 48
2.2. Bases of fuzzy sets theory..... 55
2.3. Bases of hydrocarbon reservoir engineering systems design using fuzzy sets theory./..... 103
2.4. Procedure of operator firms selection at the tender competition of oil reservoir engineering..... 182

Summary..... 192
Bibliography..... 193

Chapter 3. Modelling of natural hydrocarbons reservoirs engineering in fuzzy and uncertain environment 199

3.1. Stochastic and fuzzy-stochastic modelling of oil and gas reservoirs..... 199
3.2. Selection of objects for exploitation using fuzzy sets theory..... 256
3.3. Selection of oil recovery method using fuzzy logic..... 274
3.4. Selection of well spacing density and systems using fuzzy sets theory..... 318
3.5. Selection of oil producing method..... 330

Summary..... 340
Bibliography..... 342

Chapter 4. Computer technologies of hydrocarbon reservoir development processes..... 352

4.1. Sequential estimation of oil and gas reservoir development..... 353
4.2. Parallel estimation of hydrocarbons reservoir engineering processes..... 354
4.3. Integrated estimation of oil and gas reservoir development..... 355
4.4. Principles of CAD design based on multi-target system approach. Description of structure and organisation of main CAD modules..... 365
4.5. Expert systems of oil and gas reservoir engineering..... 384
4.6. Data base of EOR/IOR methods..... 389

Summary..... 394
Bibliography..... 395

Chapter 5. Multi-criterial analysis of hydrocarbons reservoir development using fuzzy sets theory....... 412

Summary..... 432
Bibliography..... 432

Chapter 6. Perspective of reservoir development systems with respect of uncertainty and fuzziness of data....... 440

Conclusion..... 443

Resume..... 447
