

Сведения о научном руководителе диссертации

Новичковой Даны Александровны

«Молекулярное моделирование структурно-динамических и каталитических характеристик холинэстераз различных типов»

Научный руководитель: Лущечкина Софья Владимировна

Ученая степень: кандидат химических наук по специальности 02.00.15 – «Кинетика и катализ»

Ученое звание: нет

Должность: старший научный сотрудник

Место работы: Федеральное государственное бюджетное учреждение науки Институт биохимической физики им. Н.М. Эмануэля Российской академии наук

Адрес места работы: 119334, Российская Федерация, г. Москва, ул. Косыгина, д. 4

Тел.: +7-495-939-71-80

E-mail: sofyalu@deom.chph.ras.ru

Список основных научных публикаций по специальности «Кинетика и катализ» за последние 5 лет:

1. A new sensitive spectrofluorimetric method for measurement of activity and kinetic study of cholinesterases. Mukhametgalieva A.R., Zueva I.V., Aglyamova A.R., Lushchekina S.V., Masson P. Biochimica et Biophysica Acta - Proteins and Proteomics, 2020, v. 1868, article 140270
2. Steady-State Kinetics of Enzyme-Catalyzed Hydrolysis of Echothiophate, a P-S Bonded Organophosphorus as Monitored by Spectrofluorimetry. Zueva Irina V., Lushchekina Sofya V., Daudé David, Chabrière Eric, Masson Patrick. Molecules, 2020, v. 25, p.1371
3. Water-soluble betaines and amines based on thiacalix[4]arene scaffold as new cholinesterase inhibitors P.L. Padnya, E.E. Bayarashov, I.V. Zueva, S.V. Lushchekina, O.A. Lenina, V.G. Evtugyn, Y.N. Osin, K.A. Petrov, I.I. Stoikov, Bioorganic Chemistry, 2019, article 103455
4. 6-Methyluracil derivatives as peripheral site ligand-hydroxamic acid conjugates: Reactivation for paraoxon-inhibited acetylcholinesterase V.E. Semenov, I.V. Zueva, S.V. Lushchekina, O.A. Lenina, L.M. Gubaidullina, L.F. Saifina, M.M. Shulaeva, R.M. Kayumova, A.F. Saifina, A.T. Gubaidullin, S.A. Kondrashova, S.K. Latypov, P. Masson, K.A. Petrov, European Journal of Medicinal Chemistry, 2020, 185, article 111787
5. Synthesis of 2-arylhydrazinylidene-3-oxo-4,4,4-trifluorobutanoic acids as new selective carboxylesterase inhibitors and radical scavengers O.G. Khudina, G.F. Makhaeva, N.A. Elkina, N.P. Boltneva, O.G. Serebryakova, E.V. Shchegolkov, E.V. Rudakova, S.V. Lushchekina, Y.V. Burgart, S.O. Bachurin, R.J. Richardson,

V.I. Saloutin, Bioorganic & Medicinal Chemistry Letters, 2019, 29(23), article 126716

6. Synthesis, molecular docking, and biological evaluation of 3-oxo-2-tolylhydrazinylidene-4,4,4-trifluorobutanoates bearing higher and natural alcohol moieties as new selective carboxylesterase inhibitors G.F. Makhaeva, N.A. Elkina, E.V. Shchegolkov, N.P. Boltneva, S.V. Lushchekina, O.G. Serebryakova, E.V. Rudakova, N.V. Kovaleva, E.V. Radchenko, V.A. Palyulin, Y.V. Burgart, V.I. Saloutin, S.O. Bachurin, R.J. Richardson, Bioorganic Chemistry, 2019, V. 91, article 103097
7. Time-course of human cholinesterases-catalyzed competing substrate kinetics A.R. Mukhametgalieva, A.R. Aglyamova, S.V. Lushchekina, M.Goličnik, P. Masson, Chemico-Biological Interactions, 2019, V. 310, article 108702.
8. The four-helix bundle in cholinesterase dimers: Structural and energetic determinants of stability D.A. Novichkova, S.V. Lushchekina, O. Dym, P. Masson, I. Silman, J.L. Sussman, Chemico-Biological Interactions, 2019, 309, article 108699.
9. Computer-designed active human butyrylcholinesterase double mutant with a new catalytic triad B.L. Grigorenko, D.A. Novichkova, S.V. Lushchekina, I.V. Zueva, L.M. Schopfer, A.V. Nemukhin, S.D. Varfolomeev, O. Lockridge, P. Masson. Chemico-Biological Interactions, 2019, 306, p. 138-146
10. «Ингибиторы холинэстераз и карбоксилэстераз как фармакологические агенты» Г. Ф. Махаева, Е. В. Рудакова, Н. В. Ковалева, С. В. Луцкекина, Н. П. Болтнева, А. Н. Прошин, Е. В. Щегольков, Я. В. Бургарт, В. И. Салоутин. Известия Академии наук. Серия химическая, 2019, № 5, стр. 967-984.
11. Supercomputer modeling of dual-site acetylcholinesterase (AChE) inhibition S. V. Lushchekina, G. F. Makhaeva, D. A. Novichkova, I. V. Zueva, N. V. Kovaleva, R. J. Richardson. Supercomputing Frontiers and Innovations, 2018, 5(4), p. 89-97.
12. Catalytic bioscavengers against organophosphorus agents: mechanistic issues of self-reactivating cholinesterases S. V. Lushchekina, P. Masson. Toxicology, v. 409, p. 91-102
13. Synthesis, molecular docking, and biological activity of 2-vinyl chromones: toward selective butyrylcholinesterase inhibitors for potential Alzheimer's disease therapeutics G.F. Makhaeva, N.P. Boltneva, S.V. Lushchekina, E.V. Rudakova, O.G. Serebryakova, L.N. Kulikova, A.A.Beloglazkin, R.S. Borisov, R.J. Richardson, Bioorganic & Medicinal Chemistry, 2018, 26(16), p. 4716-4725.
14. Conjugates of Tacrine and Its Cyclic Homologues with p-Toluenesulfonamide Are Novel Acetylcholinesterase and Butyrylcholinesterase Inhibitors G. F. Makhaeva, N. V. Kovaleva, S. V. Lushchekina, E. V. Rudakova, N. P. Boltneva, A. N. Proshin, B. V. Lednev, I. V. Serkov, S. O. Bachurin. Doklady Biochemistry and Biophysics, 2018, Vol. 483, p. 369-373.

15. Analysis of apparent catalytic parameters of multiple molecular forms of human plasma butyrylcholinesterase by activity gel-scanning following non-denaturing electrophoresis P. Masson, S. Lushchekina, BioNanoScience, 2017, v. 8(1), p. 367-372.
16. «Optimization of Cholinesterase-Based Catalytic Bioscavengers Against Organophosphorus Agents» Lushchekina S.V., Schopfer L.M., Grigorenko B.L., Nemukhin A.V., Varfolomeev S.D., Lockridge O., Masson P. Frontiers in Pharmacology, 2018, v. 9, article 211.
17. Three Faces of N-Acetylaspartate: Activator, Substrate and Inhibitor of Human Aspartoacylase M.G. Khrenova, E.D. Kots, S.D. Varfolomeev, S.V. Lushchekina, A.V. Nemukhin, J. Phys. Chem. B, 2017, 121, p. 9389–9397.
18. Суперкомпьютерные технологии в структурно-кинетическом исследовании механизмов ферментативного катализа. квантово-химическое описание катализа аспартоацилазой Варфоломеев С.Д., Коц Е.Д., Хренова М.Г., Луцкина С.В., Немухин А.В. Доклады Академии наук. 2017. Т. 474. № 4. стр. 444-447.
19. Esterase profiles of organophosphorus compounds *in vitro* predict their behavior *in vivo* G. F. Makhaeva, E. V. Rudakova, O. G. Serebryakova, A. Yu. Aksinenko, S. V. Lushchekina, S. O. Bachurin, R. J. Richardson, Chemico-Biological Interactions, 2016, v. 259 part B, p. 332-342.
20. Understanding the non-catalytic behavior of human butyrylcholinesterase silent variants: Comparison of wild-type enzyme, catalytically active Ala328Cys mutant, and silent Ala328Asp variant S. Lushchekina, A. Nemukhin, S. Varfolomeev, P. Masson, Chemico-Biological Interactions, 2016, v. 259 part B, p. 223-232.
21. Slow-binding inhibition of acetylcholinesterase by an alkylammonium derivative of 6-methyluracil: mechanism and possible advantages for myasthenia gravis treatment A.D. Kharlamova, S.V. Lushchekina, K.A. Petrov, E.D. Kots, F.V. Nachon, M. Villard-Wandhammer, I.V. Zueva, E. Krejci, V.S. Reznik, V.V. Zobov, E.E. Nikolsky, P. Masson, Biochemical Journal, 2016, 473(9), p. 1225-1236.
22. Slow-binding inhibition of cholinesterases, pharmacological and toxicological relevance P. Masson, and S. Lushchekina, Archives of Biochemistry and Biophysics, 2016, v. 593, p. 60-68.

Ученый секретарь диссертационного совета МГУ.02.08
