Dear Mr Ponomarev,

The International Atomic Energy Agency (IAEA) will hold the **Consultancy Meeting on Recycling of Plastic Wastes Using Radiation Technology** (hereinafter referred to as "event"), which had to be postponed owing to the COVID-19 pandemic, virtually via Cisco WebEx from **27 to 30 October 2020**.

The purpose of the event is to discuss the latest achievements in the recycling of plastic wastes using radiation technology, and to propose a possible coordinated research project.

The event will be held in English.

I have the pleasure of inviting you to advise the IAEA during the event. Your contribution to the outcome of the event would be of great value, and it is hoped that the event will have the benefit from your experience in this area of work.

Ten (10) days before the event you will receive technical information that will enable you to join the virtual event.

It is a condition of your acceptance that you refrain from disclosing any industrial secret or other confidential information made known to you by reason of your participation in this event, and that you exercise the utmost discretion with regard to all matters related to your participation as an expert.

In this regard, you are kindly requested to complete and sign the attached *Confidentiality Undertaking for Non-Staff Members* and to return it to the Scientific Secretary of the event, Ms Celina Horak of the Division of Physical and Chemical Sciences (Email: C.Horak@iaea.org), prior to the start of the event. A breach of your obligation not to disclose confidential information without appropriate authorization, as provided for under the attached Confidentiality Undertaking, may result in the initiation of legal proceedings against you and that, for such purposes, the Director General may waive any immunity which may pertain to you.

The IAEA takes no responsibility for, and the provider of the virtual meeting services has represented and warranted that the Services shall not contain, and that no end user shall receive from the software used to hold the virtual meeting, any virus, worm, trap door, back door, timer, clock, counter or other limiting routine, instruction or design, or other malicious, illicit or similar unrequested code, including surveillance software or routines which may, or is designed to, permit access by any person, or on its own, to erase, or otherwise harm or modify any data or any system, server, facility or other infrastructure of any end user (collectively, a "Disabling Code").

I would be grateful to receive a reply at your earliest convenience as to whether you are in a position to accept this invitation.

Yours sincerely,

Melissa Denecke
Director
Division of Physical and Chemical Sciences
Department of Nuclear Sciences and Applications
